JAVA

■ Introduction:-
 This course uses Jre 7 for Java programs

- what Java is & how it works.

Java is the most used programming language now-a-days.

```

graph TD
    A[Text  
*.Java] -- "Javac (JDK)" --> B[Binary  
*.class]
    B -- "JVM (JRE)" --> C[Computer  
Program]
  
```

■ Programming Core Java

* A Hello world program:-

```

public class Application {
    public static void main (String[] args) {
        System.out.println("Hello world");
    }
}
  
```

* Using Variable :-

```
public class Application {  
    public static void main (String[] args) {  
        int myNumber = 88;  
        short myShort = 847;  
        long myLong = 9797;  
        double myDouble = 7.8243;  
        float myFloat = 324.3f;  
        char myChar = 'y';  
        boolean myBoolean = false;  
        byte myByte = 127;  
        System.out.println(myNumber);  
        System.out.println(myLong);  
        System.out.println(myChar);  
        System.out.println(myByte);  
    }  
}
```

Output

88

9797

y

127
